Students Joined the “Protected Nature — Our Future” Event and Called for Protecting Nature

With the aim of protecting nature, fostering ecological knowledge and education from an early age, and providing knowledge about rare animals and plants, the Nalaikh and Bagakhangai District Prosecutor's Office, in cooperation with the Justice Club, a children's self-governing organisation, announced an essay-writing and presentation contest among senior-grade students on the theme “Protected Nature — Our Future.”

The children taking part in the presentation contest emphasised that environmental issues are not the work of a single organisation or a single person, but a universal duty and responsibility requiring everyone's participation. Of the 5 presentations delivered in the final round of the contest, Polytechnic College student A.Maraltsetseg won first place with her presentation on the topic “Climate Change Caused by Greenhouse Gas Emissions and the Participation of the Younger Generation.”
